New ADOBE license for Acrobat Pro available to all staff at JU

Jönköping University has recently signed a new 3-year agreement for software from Adobe. This means that all staff with employment will have access to Adobe Acrobat Pro (for editing/creating PDF files).

In connection with the activation of the new agreement, many users have recently received a mailing from the sender Adobe *<notifications@adobe.com>* och titeln: ***"Get started with Acrobat Pro -Faculty/Staff"***
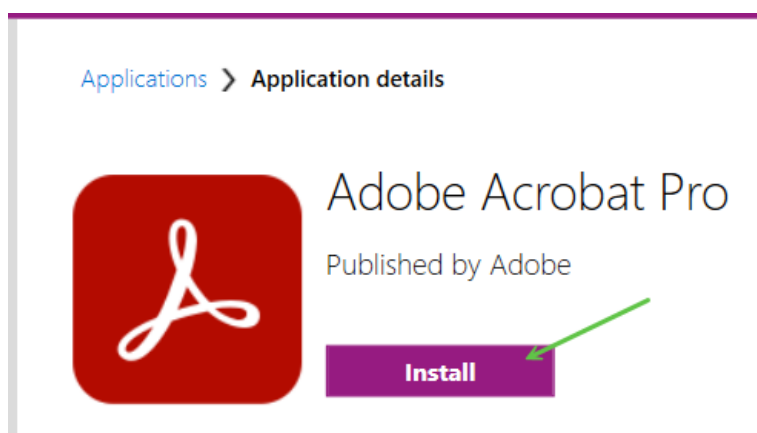

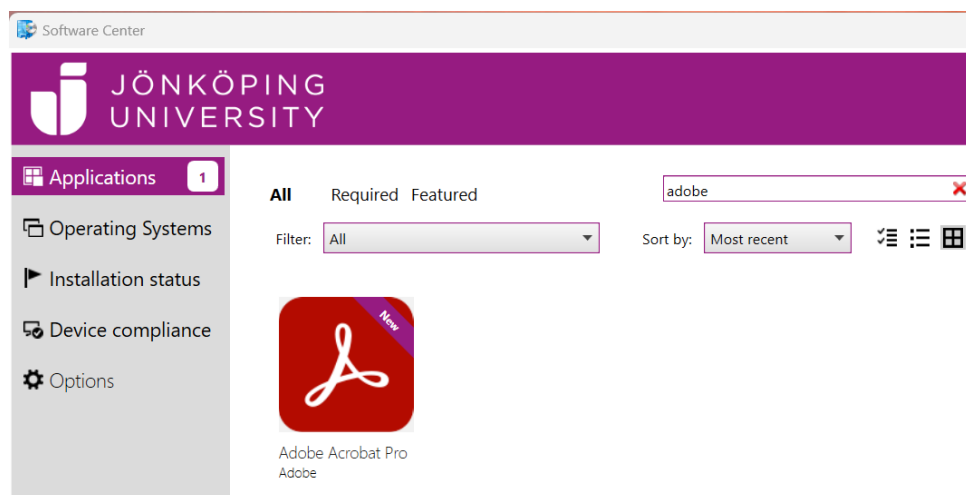

What do I need to do now?

If you already have software from Adobe installed on your computer, you do not need to do anything at this point as current installations/licenses of Adobe Acrobat and other software will continue to work.

I don't have Adobe Acrobat today and want to install it on my computer?

Method #1 – only applies to JU owned computers)
To simplify the installation, JU has developed a ready-made installation package that you can access through Software Center on your computer. Go to : START >> Software Center > Adobe Acrobat Pro

*NB! You may need to run the installation 2 times in some cases to get it to work*
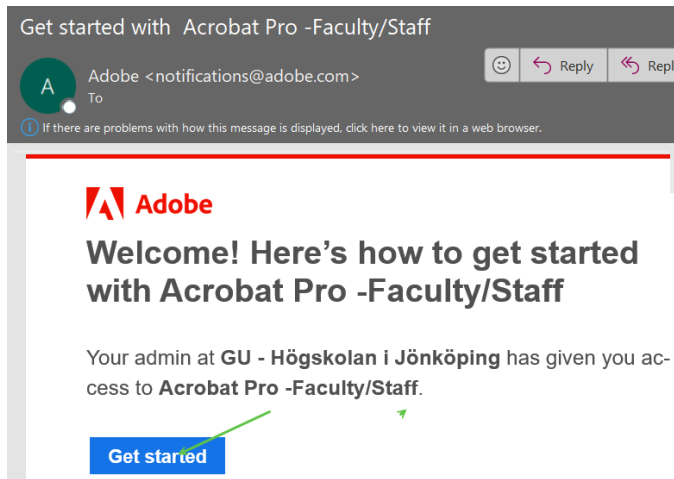

Method #2 - Personal Computer Only)

If you use Adobe software on multiple computers, it may be helpful to know that you can only use your Adobe license on one device at a time, but your account may be signed in on up to two (2) devices simultaneously.

To install Acrobat Pro on a privately owned computer, follow the instructions in the email to download the software. You can also use this link to access the download-page:

https://helpx.adobe.com/se/acrobat/kb/acrobat-dc-downloads.html#installationinstructions

På Windows-dator behöver du packa upp ZIP-filen på datorn först (högerklicka och välj "Extract All…").
På Mac-dator så dubbelklickar du bara på .DMG-filen.

Slutligen kör du installationen genom att dubbelklicka på setup.exe och följer anvisningarna.
