

Microsoft Azure Dev Tools for Teaching (former Microsoft Imagine)

LINK : <https://azureforeducation.microsoft.com/devtools>

Azure for Dev Tools is a service provided by Microsoft to enable students/teachers to evaluate and understand Information Technology. Software and services provided via Azure for Dev Tools and may not be used for the University's operation or for commercial purposes. Microsoft Azure Dev Tools includes, among other things, the latest version of Windows, but you won't find Microsoft Office here. You can reach the Office tools instead via the Office 365 service www.office.com with your regular JU account.

Students log in with their personal username followed by @student.ju.se and employees with their username followed by @ju.se.

You only have access to Microsoft Azure Dev Tools while you are an active student or employed at JU. You have the right to use the installed programs even after completing your studies/employment, but cannot download or request new license keys.

JU cannot control the availability, functionality and offerings associated with the Microsoft Azure Dev Tools website and cannot correct any errors or disruptions. In case of problems, you can try at a later time or contact Microsoft directly for further help. JU does not take responsibility for the individual's installation, provide support or take responsibility for any errors. If you use this free service, you are referred to the instructions available through the Microsoft Azure Dev Tools official [help pages](#).

When you download software from the portal, you access these in a similar way as an online store. At one stage in the download process, a so-called product key is displayed. Product keys are personal. Make a note of it as you will need it during installation to confirm your right to install. If you lose the key, it can be retrieved at the same place where you download the programs.

After downloading an *.iso or *.img file, you can e.g. burn your software onto a CD/DVD to be able to install it on your computer. You can also mount it as a virtual CD/DVD player in Windows.

Start your subscription by visiting the web-page below:

Visio Professional 2021

Microsoft Visio Professional 2021 makes it easier than ever for individuals and teams to create and share professional, versatile diagrams that simplify complex information. It includes all of the functionality of Visio Standard 2021 as well as updated shapes, templates, and styles; enhanced support for team collaboration, including the ability for several people to work on a single diagram at the same time; and the ability to link diagrams to data instantly. Visio Professional 2021 also helps prevent information leakage by enabling Information Rights Management.
